The safest bet would be the

as those would guarantee 144 Hz at 1080p even at high settings.

Playing Call of Duty Warzone on the GeForce RTX 3060 Max-Q, which is a 3 year old graphics card will likely return a reliable 83 FPS

. That base FPS is at 1080p and High visual settings. The 45 FPS on 1440p Ultra setting is a great way of running this game with this GPU.
