<p></p></p>A multiplayer video game is a video game in which mo

re than one person can play in the same game💶 environment at the same ti

me, either locally on the same computing system (couch co-op), on different comp

uting systems via a💶 local area network, or via a wide area network, mos

t commonly the Internet (e.g. World of Warcraft, Call of Duty,💶 DayZ). M

ultiplayer games usually require players to share a single game system or use ne

tworking technology to play together over💶 a greater distance; players m

ay compete against one or more human contestants, work cooperatively with a huma

n partner to achieve💶 a common goal, or supervise other players' act

ivity. Due to multiplayer games allowing players to interact with other individu

als, they💶 provide an element of social communication absent from single

-player games.</p>

<p>Multiple types of games allow players to use local multiplayer. The

ltiplayer games played in a cooperative manner on the same system;💶 thes

e may use split-screen or some other display method. Another option is hot-seat

games. Hot-seat games are typically turn-based games💶 with only one cont

roller or input set such as a single keyboard/mouse on the system. Players rot

ate using the💶 input device to perform their turn such that each is taki

ng a turn on the "hot-seat".</p>

<p>Online multiplayer games connect players💶 over a wide area netw

ork (a common example being the Internet). Unlike local multiplayer, players pla

ying online multiplayer are not💶 restricted to the same local network. T

his allows players to interact with others from a much greater distance.</p>
