Magmas are located in the crust, causing a volcanic eruption! When magma flows on the Earth's surface, it is called lava. Like solid rock, magma is

A mixture of minerals.

Magma - National Geographic Society nationalgeographic : encyclopedia ;

Magmas are found in the Earth's crust where molten rock is squeezed out of

the crust. That molten rock / flows beneath the surface of the Earth.

When it flows beneath the

surface of the Earth, it is called lava. When it flows beneath the

surface of the Earth, it is called

lava. When it flows beneath the surface of the Earth, it is called

lava. When it flows beneath the surface of the Earth, it is called

lava. When it flows beneath the surface of the Earth, it is called

lava. When it flows beneath the surface of the Earth, it is called

lava. When it flows beneath the surface of the Earth, it is called
