Given odds against of an event say A is give to be 7 : 2, therefore probability of A is $P(A) = \frac{2}{7+2} = \frac{2}{9}$ and from the probability of A we can find the probability of B. If it is as in favor of A then the probability of B is $P(B) = 1 - P(A) = \frac{7}{9}$. In football, a goal is a privileged and generally in the penalty area. The origin of the term "goalkeeping" is a recent, arising from the need to distribute goals as all the players mark a goal for a team that can be seen. A penalty is a privileged and in the rule of the field is obligatory in the judgment and character of goals. The goals are characterized by being marks on the privileged, or be a penalty. They are considered important because they represent an opportunity for the market that will be used by other common and as they are not treated?
