The linear range can be measured simply by making a plot of analyte concentration versus fluorescence, using evenly-spaced analyte concentrations, and seeing at what concentration the data deviate from a straight line that is tangent to the low end of the concentration range.

How to calculate linear range and LOD from fluorescence sensitivity ...

How to calculate linear range and LOD from fluorescence sensitivity ...

Determining the linear range is relatively easy, and can be achieved by taking a sample and performing a serial dilution. If the ranges overlap then determining the amount of sample to load is also similarly easy.

Linear range of detection and what it means for your quantifications
