<p></p><p>The TL;DR version of this review is: surprising light, extremely pocketable, does the job, not my dream charger but at , the price it s well worth it.</p>
<p>We ve covered a product of Lepow s before, the Moonstone. Like the Moonstone, the Poki comes , with a cloth carrying case that you can stash a USB cable in (it appears to come with a 6 † , USB-> MicroUSB,) or chuck your ID and credit card in and use it as a wallet while you re out. It s , actually the first thing that stood out when I was looking at the device. The Moonstone is still going strong , with a friend of mine a year later.</p>
<p>The battery delivers a 90% conversion efficiency rating according to specs on the , manufacturer s website. Most batteries go from the high 70 s to mid 80 s. You want to see a higher number as , this is how much power gets delivered with the rest being lost in conversion.</p>
<p>The Poki can charge and recharge at , 2.1amps. This means you re not stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp you should , be able to charge this in under five hours and with 90% conversion efficiency you should have around 9000mAh of , actual juice to spare. That should be enough for at least three complete charges from dead to full for any , smartphone on the market today.</p>
<p>2.1 amp charging also means you re not going to spend ~7 hours charging a 3000mA phone , from dead, more like an hour and a half if your phone supports it.charging that fast.</p>
