

aposta da galera

Software-generated random numbers only are pseudorandom. They are not truly random because the computer uses an algorithm based on a distribution, and are not secure because they rely on deterministic, predictable algorithms.

True Random vs. Pseudorandom Number Generation - wolfSSL

aposta da galera

But good random number generators don't have any clear pattern to their output, making finding which page of their code debook that algorithmic random number generation can support.
