At 1920x1080, the GeForce GTX 1060 hit an average of 70 FPS and went no lower than 60 FPS, which is why the game's developers at the PUBG Corporation made the GeForce GTX 1060 the official recommended GeForce GTX graphics cards.

The GeForce GTX 1060 is a great graphics card for gamers who don't need the fastest graphics card, but still want good performance. It's a solid choice for most games and it can also be used for video editing and other professional tasks.
